

# Insect traps

# FORUM

The FORUM is completely sealed and is recommended for use in the agricultural, wine-producing, horticultural and industrial sectors which are subject to splashing water and/or flying particles (IP54).

'Wing'  
openings

## Directions

- Position away from light.
- Mount 2 to 3 metres above ground-level between the areas to be protected and the insect entry points.
- Servicing: replace the tubes annually and the glue board every 2 months.
- Pests: fruit flies, flies, mosquitoes, wasps, moths, etc.

## Optional

- Bracket  
(See Accessories on page 44)

- Maximum protection: **SYLVANIA** or **PHILIPS** shatterproof tubes
- Sealed against water and particles (for the IP54 version)
- Ferromagnetic ballasts: long-lasting and reliable
- Detachable insect collection tray (electric version)
- Customisation (2 units or more)
- Attraction surface area: between 80 and 240 m<sup>2</sup>
- Chain supplied
